

crystal scroll & sierra™

IMPORTANT UNPACKING INSTRUCTIONS

Dear Customer:

Thank you for ordering your lighting from Studio Steel.

We have implemented significant quality control procedures to ensure your Studio Steel Crystal Scroll and Crystal Sierra or Sierra Chandelier is carefully packed and shipped complete.

However it is VERY IMPORTANT to un-pack it according to the following instructions, step by step, to avoid damaging the more delicate areas of your new fixture.

STEP-BY-STEP INSTRUCTIONS:

1. Cut the black strapping material that surrounds the outer carton, open up the top flaps, and remove the top cardboard tray.
2. Remove the outer side cardboard (usually corner pieces).
3. Remove one side of the interior cardboard, which is attached to the wooden frame.
4. Remove all the peanuts by hand, and do not tip box over to "pour" out.
5. Cut the bottom cardboard straps which hold each of the bottom arms of the chandelier.
6. Remove the wire which holds the top of the chandelier to the top wooden brace.
7. Remove the top wooden brace.
8. Chandelier is ready to be taken from the box, and installed by your certified electrician.
